Technical Skills

Languages: TypeScript/JavaScript, Python, Java, C#, C/C++, SQL

Web & APIs: React, Vue.js, Angular, Node.js, Express, ASP.NET Core, GraphQL, REST APIs, HTML/CSS

Data & Cloud: PostgreSQL, DynamoDB, Snowflake, HDF5/h5py, AWS (Lambda, AppSync, SNS, S3, CodePipeline, CloudWatch), Docker

Quality & Delivery: Jest, Vitest, Playwright, Postman, Git/GitHub, GitHub Actions, Jenkins, GitLab CI/CD, Datadog, PagerDuty, Linux/Unix, UAT

Experience

Full-Stack Software Engineer

June 2023 - September 2026

QSRSoft [Remote]

- Owned Calendar, Chat, and reporting features used by 1,000+ franchise managers, carrying work from product requirements and technical planning through implementation, testing, rollout, production verification, and follow-up.
- Built TypeScript/Vue interfaces and Node.js/Express services with GraphQL/REST APIs, PostgreSQL, DynamoDB, Snowflake integrations, and AWS; implemented AWS SNS notification workflows with duplicate-event/idempotency safeguards.
- Diagnosed production issues across browser, network, API, service, integration, and data layers using Postman, Datadog, CloudWatch, PagerDuty, logs, and SQL; verified fixes through Jest/Vitest, beta/UAT, and production monitoring.

Software Development Engineer

July 2022 - February 2023

Zoom Video Communications [Chicago, IL]

- Developed and debugged production Android features in Java and C++ using MVVM, multithreading, protocol buffers, inter-process communication, and APIs across client, network, and service boundaries.
- Collaborated with an international engineering and QA team in Linux using GitLab and Jenkins CI/CD to troubleshoot integration issues and validate production changes.

Software Engineering Intern

June 2021 - August 2021

BlackRock [Chicago, IL]

- Led a three-person intern team building an Angular/TypeScript and Java/Spring Exceptions Monitor that retrieved thousands of operational exceptions through REST APIs and presented aggregated data in an interactive client.

Wireless Networking & Communication Research Assistant

May 2019 - May 2021

Illinois Institute of Technology [Chicago, IL]

- Processed and visualized ~17 GB/day of HDF5 radio-spectrum observatory data using Python, NumPy, pandas, h5py, and Matplotlib; built occupancy analyses and contour/waterfall plots across time and frequency, and led Python workshops for a 14-member research team.

Technical Product Manager & Tableau Visualizations Engineer

July 2020 - August 2020

GE Healthcare [Chicago, IL]

- Built 10 KPI dashboards for the HR Digital Technology Data & Analytics team; queried and validated warehouse data, analyzed trends, and partnered with stakeholders on requirements and usability.

Selected Software Projects

Portfolio Website: Built and deployed a React/TypeScript portfolio with live weather/astronomy visuals, responsive/reduced-motion behavior, accessibility checks, Vitest/Playwright coverage, and GitHub Actions/Pages delivery. *React | TypeScript | Vitest | Tailwind | Playwright*

Wordsmith - Notion Writing Pulse: Built a Notion-integrated writing analytics tool for page/manuscript word counts, snapshots and goals, webhook-driven recount/write-back, and an embeddable dashboard. *React | TypeScript | Node.js | PostgreSQL | Notion API*

Virtual Wardrobe: Built the Phase 1 full-stack foundation for a wardrobe platform with a React/TypeScript client, ASP.NET Core/C# REST API, PostgreSQL data model, Docker local stack, tests, and CI. *React | TypeScript | C# | ASP.NET Core | PostgreSQL | Docker*

Star Baker: Built and published a Unity/C# side-scrolling game with player movement, collision/gameplay systems, collectible objects, hazards, and a browser-playable WebGL build. *Unity | C# | WebGL*

Education & Leadership

M.S. & B.S. in Computer Science | Illinois Institute of Technology

May 2022

GPA: 3.9/4.0 | Teaching/Lab Assistant (2019-2022): taught 80+ students across Python, Java, C, Scala, MIPS/x86 assembly, systems, data structures, and Docker. Founder & President, Google Developer Student Clubs: led a 120+ member organization and taught Google Cloud and Android development.
